

NIKITA DIGODIYA

Junior AI/ML Engineer | Python Developer

Indore, M.P., India • nikitadigodiya31@gmail.com • github.com/Nickyit • [LinkedIn](#) • [LeetCode](#)

PROFESSIONAL SUMMARY

Python developer and Machine Learning enthusiast with hands-on experience building NLP pipelines, text classification models, and chatbot systems. Proficient in Scikit-learn, Pandas, NumPy, and TF-IDF-based feature engineering. Seeking a Junior AI/ML Engineer or Python Developer role to apply production-ready ML skills and contribute to real-world data-driven applications.

TECHNICAL SKILLS

Languages: Python (primary), C++, JavaScript, HTML, CSS

ML / AI: Scikit-learn, TF-IDF, Logistic Regression, NLP, text classification, sentiment analysis

Data & Libraries: NumPy, Pandas, data preprocessing, data pipelines, model evaluation (precision, recall, F1)

Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, VS Code

Databases: SQL (SQLite — basic)

Familiar With: TensorFlow (learning), Hugging Face Transformers (learning), Flask/FastAPI (learning), REST APIs

PROJECTS

Sentiment Analysis using NLP | Personal Project | 2025

- Engineered a **TF-IDF + Logistic Regression** text classification pipeline in Python, achieving **~87% accuracy** on a real-world sentiment dataset — demonstrating end-to-end ML model development.
- Built a data preprocessing pipeline using **Pandas and Scikit-learn**, cleaning and transforming **5,000+ text samples** — automating tokenisation and vectorisation to cut manual prep time.
- Evaluated model performance using **precision, recall, and F1-score** metrics; iterated on feature engineering to reduce misclassification rate on imbalanced classes.
- Managed source code using **Git** with structured commits on GitHub, maintaining clean version history throughout the project lifecycle.

NLP-Powered Chatbot | Personal Project | 2026

- Developed an **NLP-powered chatbot** in Python capable of handling **20+ intent categories** using text preprocessing and pattern-matching logic to deliver context-aware, rule-based responses.
- Implemented modular, reusable Python code with string tokenisation and regex-based parsing — reducing query resolution time and laying groundwork for future **ML-driven intent classification**.
- Applied rule-based response logic with string processing techniques; codebase structured for extensibility and easy integration with **REST API** endpoints.

EDUCATION

Bachelor of Engineering — Computer Science | Rajiv Gandhi Proudyogiki Vishwavidyalaya | 2023 – 2027

- Relevant coursework: Data Structures, Algorithms, Database Management, Machine Learning fundamentals.
- Active participant in competitive programming on LeetCode; strong foundations in Python and C++.

INTERNSHIP EXPERIENCE

Artificial Intelligence Intern | Persevox | Nov 2025 – Jan 2026

- Completed a 2-month hands-on AI internship, applying machine learning and NLP techniques to real-world problem statements under professional mentorship.

- Demonstrated strong commitment and technical competence throughout the program; awarded certificate of completion (ISO 9001 certified institute, Startup India recognised).

CERTIFICATIONS & CONTINUOUS LEARNING

- **Deloitte Data Analytics Job Simulation** — Forage, Dec 2025. Tasks: data analysis, forensic technology.
- **AI in Action Job Simulation** — Forage, Dec 2025. Tasks: prompt engineering, AI workflow automation.
- **Introduction to Generative AI** — Mar 2026. Certificate code: 9971536.
- **Introduction to Generative AI Studio** — Mar 2026. Certificate code: 9975566.
- **Yantra Quest — National Technology Day 2025 Quiz** — Technology Development Board, Govt. of India / MyGov, 2025.
- Currently expanding skills in TensorFlow, PyTorch, and Hugging Face Transformers — targeting model deployment with Flask/FastAPI.
- Regular practice on LeetCode — demonstrating problem-solving and data structures proficiency.

KEY TECHNOLOGIES

Python • Machine Learning • NLP • Scikit-learn • TF-IDF • Logistic Regression • Pandas • NumPy • Data Preprocessing • Text Classification • Sentiment Analysis • Git • GitHub • Jupyter Notebook • Model Evaluation • F1-score • Data Pipelines • SQL • REST APIs • Hugging Face Transformers (learning) • Flask (learning) • TensorFlow (learning)
